FACHRI ALVIANSYAH Quality Assurance Engineer

+6281-29353-3330 | fachrialviansyah@gmail.com | linkedin.com/in/fachrialviansyah | github.com/fachrialviansyah | portfolio.fachrialviansyah | Koja, Jakarta Utara

QA Engineer with a strong software development background and 4+ years of experience in building and maintaining applications. Experienced in debugging, application testing, and documentation, with hands-on experience in test automation using Selenium, Katalon, and Playwright, as well as API testing using Postman. Familiar with behavior-driven testing practices and committed to ensuring software quality through structured testing and continuous improvement.

Skill

Code
- HTML/CSS
- PHP
- JavaScript
- Java
- Groovy
- SQL

Manual Testing
- Test Scenario | Test Case
- Black & White Box Testing
- Gherkin Scenario
- User Acceptance Test (UAT)
- Test Documentation
- Bug Reporting & Tracking

Automation Testing
- Selenium WebDriver
- Katalon Studio
- Playwright / Cypress
- Cucumber (BDD Framework)
- RestAssured (API Testing)
- TestNG / JUnit

Tools & Document
- Jira | Trello | Redmine
- Postman
- Allure Report
- CI/CD (GitHub Action, Jenkins)
- MS Office / Google Workspace
- Git Version Control

Work Experiences

PT Vanz Inovatif Teknologi (Qbit) - South Tangerang City **Nov 2025 – May 2026**

QA Engineer – Placement at AIDO Health (Contract)

- Discussed feature enhancements and new feature development with the Project Manager based on the Product Requirement Document PRD.
- Reviewed software requirements and defined QA strategies, test plans, and structured test scenarios and test cases using BDD Gherkin format.
- Implemented web automation testing using Playwright, executed functional and usability testing, performed API automation testing using Postman, and conducted load and performance testing to ensure system stability.
- Analyzed test results, identify database and usability issues, and report documented bugs to the development team.
- Conducted post-release testing and collaborate with cross-functional teams to maintain quality throughout the Software Development Life Cycle.

Project

- Hospital Management Information System & Electronic Medical Records - AIDO Hospita

PT Webcenter Sentra Solusindo - Central Jakarta City **Mar 2022 – Jul 2025**

Developer & Manual Testing (Contract)

- Focused on testing the work completed by junior developers as part of the core development team, ensuring code quality and alignment with project standards.
- Analyzed web application projects and applied SDLC using Waterfall and Agile methods.
- Designed and executed test cases, including API testing with Postman.
- Conducted UAT with users to validate system functionality.
- Reported and fixed bugs to improve application performance and reliability.
- Trained users through presentations and provided system maintenance support.

Project

- Report Application of Power System Operation & Data Integration (RAPSODI) – PLN UIP2B
- System Automatic Meter Reader (AMR) & Application Neraca Energi – PLN UIP2B
- Generating Availability Information System (GAIS) – PLN Batam
- Logsheet – PLN UP2B Jakarta Banten & PLN Batam
- Switching Management System – PLN UP2B Jakarta Banten
- Analysis and Evaluation of the Java–Bali Power System Operation (EVOP) – PLN UIP2B

PT Nuansa Citra Ramantha - South Tangerang City **Jun 2021 – Dec 2021**
Programmer Support (Contract)

- Analyzed web application projects using Waterfall methodology and applied SDLC.
- Designed and executed test cases, including API testing with Postman.
- Conducted UAT with users to validate system requirements
- Reported project progress and discussed improvements with clients and IT leaders
- Supported system quality through issue tracking

Project

- Web E Commerce Bening Luxury

UMKM 21 Clean Shoes – Sukabumi City **Aug 2019 – Sep 2019**
Frontend Web Developer (Internship)

- Analyzed web application projects using the Waterfall method.
- Designed mockup interfaces based on client needs.
- Conducted UAT with users to validate functionality.
- Prepared project documentation and reports for supervisors.

Project

- Website Company Profile 21 Clean Shoes

Course & Certification

AfterOffice Academy – Online Bootcamp Batch II **Sep 2025 – Nov 2025**
QA Automation Katalon Studio

- Analyzed test requirements from a dummy web application and designed automated Web and API test cases using Java based Groovy language.
- Created Object Repository, Test Suites, and Test Suite Collections for organized execution.
- Implemented Data-Driven Testing (DDT) to validate multiple data sets efficiently.
- Applied Behavior Driven Development (BDD) by writing test cases in Gherkin syntax.
- Integrated Katalon Studio with Jenkins CI/CD and configured Slack notifications for test results.
- Conducted UI Web and API testing and generated detailed execution reports to evaluate test outcomes.

JayJay – Online Course **Mar 2025 – Aug 2025**
Quality Assurance Engineer

- Analyzed a dummy web application and implemented SDLC using Agile methodology.
- Implemented test cases with Java and JUnit to validate Web and API and integration to Allure Report.
- Designed and executed test cases, including API testing with Postman.
- Developed automated test scripts using Selenium.
- Applied test cases with Gherkin syntax and generated reports using Cucumber framework.
- Conducted manual testing including Unit Testing, Integration Testing, System Testing, Performance Testing, Interface Testing, Security Testing, Sanity Testing, Smoke Testing, and User Acceptance Testing.

Education

Indonesian Institute of Technology – South Tangerang City **Sep 2015 – Feb 2021**
Bachelor's Degree, Informatics Engineering
Thesis: Design and Development of a Mobile Qurban Savings Application

Cikini School Foundation – North Jakarta City **Mar 2013 – May 2015**
Vocational School, Computer Network Engineering
