+6281293533330 | fachrialviansyah@gmail.com | linkedin.com/in/fachrialviansyah | github.com/fachrialviansyah | portfolio.fachrialviansyah | Koja, Jakarta Utara

4+ years of experience in software development and creating innovative solutions to system problems. I am familiar with programming languages, bug fixing, application testing, and documentation development. I am currently switch career to a QA Engineer, and this journey has helped me deepen the concepts of software testing, test automation with Selenium and Katalon, API testing with Rest Assured, and the application of best practices in software quality assurance.

Work Experiences

PT Vanz Inovatif Teknologi (Qbit) - South Tangerang City

Nov 2025 – May 2026

QA Engineer – Placement at AIDO Health (Contract)

- Discussed feature enhancements and new feature development with the Project Manager based on the Product Requirement Document PRD.
- Reviewed software requirements and defined QA strategies, test plans, and structured test scenarios and test cases using BDD Gherkin format.
- Implemented web automation testing using Playwright, executed functional and usability testing, performed API automation testing using Postman, and conducted load and performance testing to ensure system stability.
- Analyzed test results, identify database and usability issues, and report documented bugs to the development team.
- Conducted post-release testing and collaborate with cross-functional teams to maintain quality throughout the Software Development Life Cycle.

Project

- Hospital Management Information System (HMIS) & Electronic Medical Records (EMR) - AIDO Hospita

PT Webcenter Sentra Solusindo - Central Jakarta City

Mar 2022 – Jul 2025

Developer & Manual Testing (Contract)

- Focused on testing the work completed by junior developers as part of the core development team, ensuring code quality and alignment with project standards.
- Analyzed web application projects and applied SDLC using Waterfall and Agile methods.
- Designed and executed test cases, including API testing with Postman.
- Conducted UAT with users to validate system functionality.
- Reported and fixed bugs to improve application performance and reliability.
- Trained users through presentations and provided system maintenance support.

Project

- Report Application of Power System Operation & Data Integration (RAPSODI) – PLN UIP2B
- System Automatic Meter Reader (AMR) & Application Neraca Energi – PLN UIP2B
- Generating Availability Information System (GAIS) – PLN Batam
- Logsheet – PLN UP2B Jakarta Banten & PLN Batam
- Switching Management System – PLN UP2B Jakarta Banten
- Analysis and Evaluation of the Java-Bali Power System Operation (EVOP) – PLN UIP2B

PT Nuansa Citra Ramantha - South Tangerang City

Jun 2021 – Dec 2021

Programmer Support (Contract)

- Analyzed web application projects using Waterfall methodology and applied SDLC.
- Designed and executed test cases, including API testing with Postman.
- Conducted UAT with users to validate system requirements
- Reported project progress and discussed improvements with clients and IT leaders
- Supported system quality through issue tracking

Project

- Web E Commerce Bening Luxury

UMKM 21 Clean Shoes – Sukabumi City

Aug 2019 – Sep 2019

Frontend Web Developer (Internship)

- Analyzed web application projects using the Waterfall method.
- Designed mockup interfaces based on client needs.
- Conducted UAT with users to validate functionality.
- Prepared project documentation and reports for supervisors.

Project

- Website Company Profile 21 Clean Shoes

Course & Certification

AfterOffice Academy – Online Bootcamp Batch II

Sep 2025 – Nov 2025

QA Automation Katalon Studio

- Analyzed test requirements from a dummy web application and designed automated Web and API test cases using Java based Groovy language.
- Created Object Repository, Test Suites, and Test Suite Collections for organized execution.
- Implemented Data-Driven Testing (DDT) to validate multiple data sets efficiently.
- Applied Behavior Driven Development (BDD) by writing test cases in Gherkin syntax.
- Integrated Katalon Studio with Jenkins CI/CD and configured Slack notifications for test results.
- Conducted UI Web and API testing and generated detailed execution reports to evaluate test outcomes.

JayJay – Online Course

Mar 2025 – Aug 2025

Quality Assurance Engineer

- Analyzed a dummy web application and implemented SDLC using Agile methodology.
- Implemented test cases with Java and JUnit to validate Web and API and integration to Allure Report.
- Designed and executed test cases, including API testing with Postman.
- Developed automated test scripts using Selenium.
- Applied test cases with Gherkin syntax and generated reports using Cucumber framework.
- Conducted manual testing including Unit Testing, Integration Testing, System Testing, Performance Testing, Interface Testing, Security Testing, Sanity Testing, Smoke Testing, and User Acceptance Testing.

Education

Indonesian Institute of Technology – South Tangerang City

Sep 2015 – Feb 2021

Bachelor's Degree, Informatics Engineering

Thesis: Design and Development of a Mobile-Based Qurban Application.

Cikini School Foundation – North Jakarta City

Mar 2013 – May 2015

Vocational School, Computer Network Engineering
