

FACHRI ALVIANSYAH Software Quality Assurance

+6281293533330 | fachrialviansyah@gmail.com | http://linkedin.com/in/fachrialviansyah | https://github.com/fachrialviansyah?tab=repositories | Koja, Jakarta Utara

5+ years of experience in software testing, quality assurance, and software development. I specialize in identifying defects, validating system functionality, and improving software quality through manual and automated testing. I use Selenium, Katalon Studio, and Playwright for test automation, and Postman and Rest Assured for API testing. I handle test planning, test design, regression testing, and defect management to deliver quality software across QA projects

Skill

Code
- HTML/CSS
- PHP
- JavaScript
- Java
- Groovy
- SQL

Manual Testing
- Test Scenario | Test Case
- Black & White Box Testing
- Gherkin Scenario
- User Acceptance Test (UAT)
- Test Documentation
- Bug Reporting & Tracking

Automation Testing
- Selenium WebDriver
- Katalon Studio
- Rest Assured (API Testing)
- Maestro
- TestNG / JUnit
- Debugging / Error Fixing

Tools & Document
- Jira | Trello | Redmine
- Postman
- Allure Report
- CI/CD (GitHub Action, Jenkins)
- MS Office / Google Workspace
- Git Version Control

Work Experiences

Dermaesthetics Group - Central Jakarta City **Jun 2026 – Present**

Quality Assurance Engineer (Contract)

- Discussed feature enhancements and new feature development with cross-functional stakeholders based on the Business Requirements Specification (BRS) and Product Requirement Document (PRD)
- Reviewed software requirements and defined QA strategies and created test plans and test scenarios and test cases.
- Executed functional, usability and API automation testing using Postman and performed load and performance testing to ensure system stability.
- Tested vendor-developed applications, validated them against business requirements and reported bugs with detailed documentation to the development team.
- Conducted UAT and SIT with stakeholders and end users, and reported testing progress to the team weekly.

Project

- Company Profile & Content Management System (CMS) - Aptos Indonesia & Dermalicious
- Clinic Management System and Enterprise Resource Planning (ERP) - Dermaster and Derma Express
- Clinic Management System and Enterprise Resource Planning (ERP) - Seoul Jakarta Plastic Surgery

PT Vanz Inovatif Teknologi (Qbit) - South Tangerang City **Nov 2025 – Mei 2026**

QA Engineer – Placement at AIDO Health (Contract)

- Discussed feature enhancements and new feature development with the Project Manager based on the Product Requirement Document PRD.
- Reviewed software requirements and define QA strategies, test plans, and structured test scenarios and test cases.
- Executed functional, usability, API automation testing using Postman, and perform load and performance testing to ensure system stability.
- Analyzed test results, identify database and usability issues, and reported bugs with detailed documentation to the development team.
- Conducted post-release testing and collaborate with cross-functional teams to maintain quality throughout the Software Development Life Cycle.

Project

- Sistem Manajemen Rumah Sakit (SIMRS) & Rekam Medis Elektronik - AIDO Hospita

PT Webcenter Sentra Solusindo - Central Jakarta City **Mar 2022 – Jul 2025**
Manual Testing (Contract)

- Focused on testing the work completed by junior developers as part of the core development team, ensuring code quality and alignment with project standards.
- Analyzed web application projects and applied SDLC using Waterfall and Agile methods.
- Designed and executed test cases, including API testing with Postman.
- Conducted UAT with users to validate system functionality.
- Reported and fixed bugs to improve application performance and reliability.
- Trained users through presentations and provided system maintenance support.

Project

- Report Application of Power System Operation & Data Integration (RAPSODI) – PLN UIP2B
- System Automatic Meter Reader (AMR), Neraca Energi & Analisa dan Evaluasi Operasi Sistem Jawa Bali (EVOP) – PLN UIP2B
- Generating Availability Information System (GAIS) & Logsheet – PLN Batam
- Switching Management System & Logsheet – PLN UP2B Jakarta Banten

Course & Certification

After Office Academy – Online Bootcamp Batch III **Sep 2026 – Nov 2026**
QA Automation Cypress

- Developed automated Web UI and API test scripts using Cypress and JavaScript, covering functional testing, assertions, and positive and negative test scenarios.
- Implemented the Page Object Model (POM) design pattern to organize test scripts, reusable functions, and page elements for maintainable and scalable test automation.
- Executed automated tests, validated application behaviour and API responses, and analyzed test results to identify defects and improve test coverage.

After Office Academy – Online Bootcamp Batch II **Sep 2025 – Nov 2025**
QA Automation Katalon Studio

- Analyzed test requirements and designed automated Web UI and API test cases using Katalon Studio, Groovy, and BDD with Gherkin syntax.
- Created and organized Object Repositories, Test Suites, and Test Suite Collections, and implemented Data-Driven Testing (DDT) to validate multiple data sets efficiently.
- Integrated Katalon Studio with Jenkins CI/CD and Slack notifications, executed automated tests, and generated detailed test reports to evaluate results and monitor software quality.

JayJay – Online Course **Mar 2025 – Aug 2025**
Quality Assurance Engineer

- Analyzed a web application and applied the SDLC using Agile methodology, including test case design and execution.
- Developed automated Web and API tests using Selenium, Java, and JUnit, performed API testing with Postman, and implemented BDD with Gherkin and Cucumber, integrating test reports with Allure.
- Conducted manual testing across Unit, Integration, System, Performance, Interface, Security, Sanity, Smoke, and User Acceptance Testing (UAT).

Education

Indonesian Institute of Technology – South Tangerang City **Sep 2015 – Feb 2021**
Bachelor's Degree, Informatics Engineering
Thesis: Design and Development of a Mobile-Based Qurban Application.

Cikini School Foundation – North Jakarta City **Mar 2013 – May 2015**
Vocational School, Computer Network Engineering
